First Procedural Limited

Good operational risk management benefits small businesses in 3 ways:

- Commercial reputation and staff morale
- Reduced legal exposure
- Efficient, consistent processes – that drive profit, continuity and sustainability

But without the in-house expertise and resource that their corporate counterparts enjoy, smaller organisations often find it difficult to deal with legal requirements or commit time to fine tune their operational processes, procedures and documentation.

First Procedural Ltd acts as an extension to your small business, helping you:

- **Identify** and understand applicable regulation and operational good practice
- **Prioritise** resources and plan for continuous improvement, at a sensible pace, one step at a time
- **Manage** safety, health, environment and operational processes in a joined-up - *integrated* - way.

We offer 3 main packages of support plus tailored consultancy packages based on individual needs - and, combining in-house and partner offerings, a one-stop service covering all of your training, communication and documentation requirements.

Standard Packages start at less than 75p per day* as follows:

150-Access

Reactive over-email support and web, Todoist Task Management and Dropbox resources

150-Assist

As 150-Access but with a half days remote planning, review and support every year

150-Assured

As 150-Access but days on-site planning, review and support every year
